

# ULTIMATE PROTECTION WITH PRECISION FILTERS ECOBREX® PROFESSIONAL OIL FILTERS

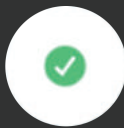

HIGH  
EFFICIENCY  
FILTER MEDIA

**OE** QUALITY  
PERFORMANCE

**3X**  
ENGINE  
PROTECTION

**2X**  
LIFETIME

ECOBREX® OIL FILTERS FEATURES:  
HIGH FILTERING PRECISION & MAXIMUM ENGINE PROTECTION

Low flow  
resistance

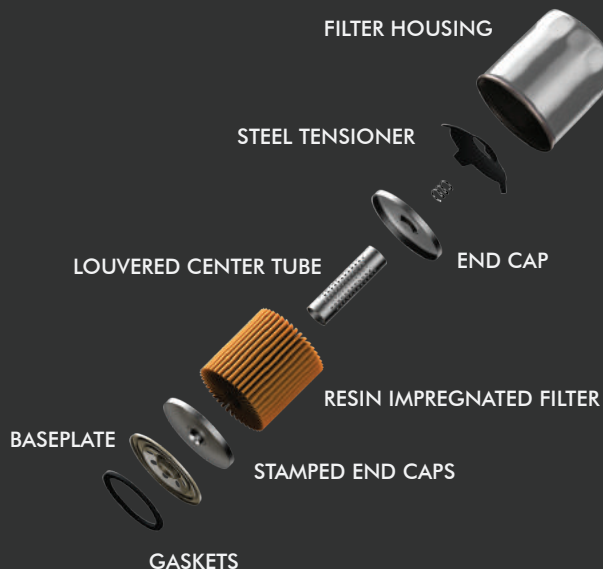

Long  
Service life

Extra dirt-trapping  
capacity\*

Extra dirt-holding  
capacity\*

High quality material  
(filter shell, center tube, gasket, etc.)

\*Ecobrex® Ecobrex® Oil Filters provide 3X more engine protection and 2X more service life compared to a regular economy filter.

Ecobrex® oil filters are designed with fuel efficiency in mind, as well as being engineered and manufactured with impressive precision. Every single component undergoes strict quality assurance tests and only then the filter itself is made available for sale.

The premium quality raw materials used in the production allow for an enhanced performance, making Ecobrex® oil filters one of the very few brands to offer amazing reliability and durability.

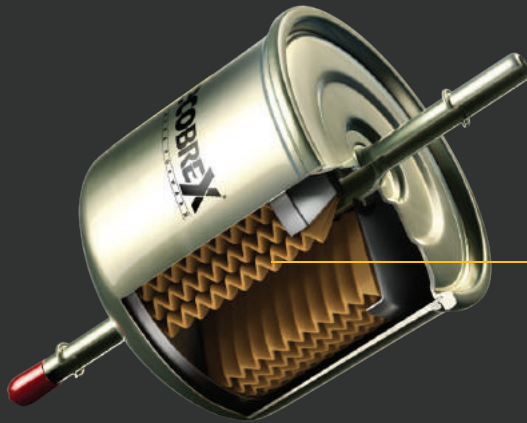

## PROFESSIONAL OIL FILTERS

Ecobrex® oil filters possess impressive precision, allowing them to trap contaminants more effectively compared to other brands, resulting in 3 times the engine protection in addition to an extended service life\*. Improved protection ultimately means better engine efficiency and lifespan, which are crucial for properly maintaining a vehicle.

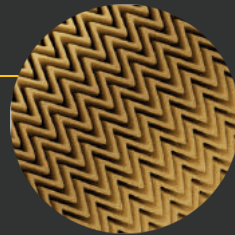

Low flow resistance helps the engine system achieve optimum lubrication while blocking more than 99% of contaminants and redundant particles. Ecobrex® oil filters are compatible with both mineral and synthetic motor oils as well, making them the perfect choice for any vehicle

ULTIMATE PROTECTION WITH PRECISION FILTERS  
**ECOBREX® PROFESSIONAL FUEL FILTERS**

**OE** QUALITY  
PERFORMANCE

**HIGH  
EFFICIENCY  
FILTER MEDIA**

**ECOBREX® FUEL FILTERS FEATURES:**

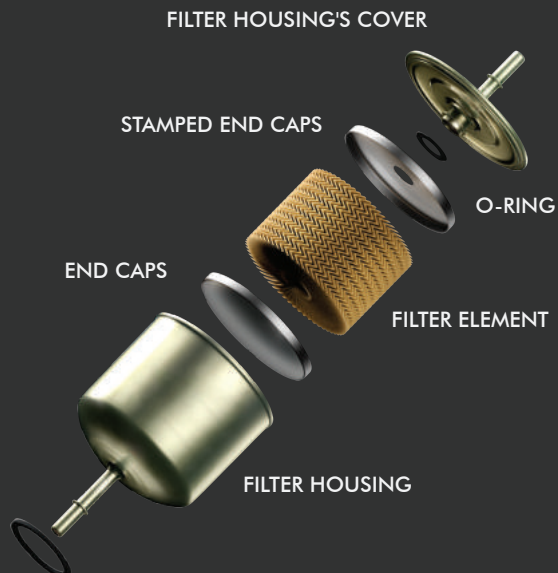

High filtering  
precision

High fuel/water  
separation

Long service  
durability

High quality  
material

High efficiency and  
performance

Ecobrex® fuel filters provide durability for the engine by trapping the particles and contaminants that would otherwise prevent the system from creating the fuel-air mixture optimally.

This hard to achieve feat has been made possible with the use of top quality raw materials and the cutting edge techniques used in the production stages of all Ecobrex® fuel filters.

## PROFESSIONAL FUEL FILTERS

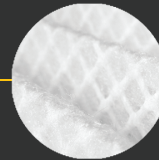

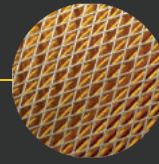

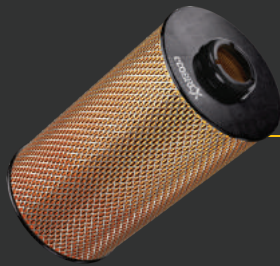

Ecobrex® fuel filters protect the delicate injection mechanism and the carburetor from harmful particles which can cause wear, such as dust, rust and even water with extreme filtering precision.

As long as the optimal fuel-air mixture level is maintained within the system, the vehicle will also have better fuel efficiency. That is why a top quality Ecobrex® fuel filter will keep both your engine and your wallet safe.

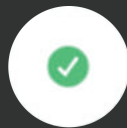

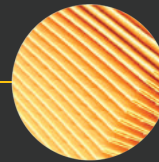

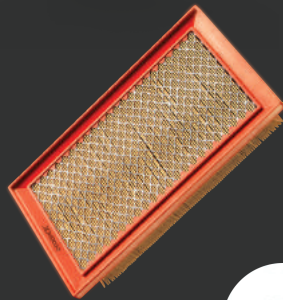

# ULTIMATE PROTECTION WITH PRECISION FILTERS **ECOBREX® PROFESSIONAL AIR FILTERS**

**OE** QUALITY  
PERFORMANCE

**HIGH  
EFFICIENCY  
FILTER MEDIA**

**ECOBREX® AIR FILTERS FEATURES:**

High separation  
of impurities  
from in-flow air

Maximizes optimum  
combustion and  
smooth operation

Reduces engine  
noise

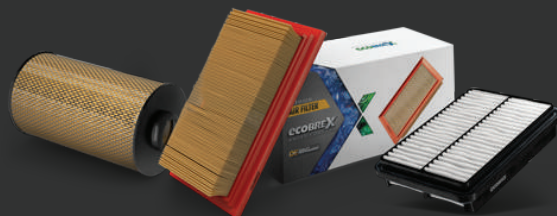

Long service span

High quality media  
and great adhesion  
to end cap

## **PROFESSIONAL AIR FILTERS**

Ecobrex® air filters effectively trap contaminants and airborne particles, delivering clean air to the engine. The quality of the air, in addition to fuel, in the combustion chamber is extremely important for the lifespan of the engine. Plus the increased duct holding capacity enhances the serviceability of the filter itself, giving Ecobrex® an edge over regular filters in the market.

Test results have shown that Ecobrex® air filters show an increase in fractional efficiency and a lower media restriction due to high filtration coefficients. This in turn results in better overall fuel efficiency and temperature control by avoiding fluctuations in the combustion chamber and keeping the engine's internal environment stable.

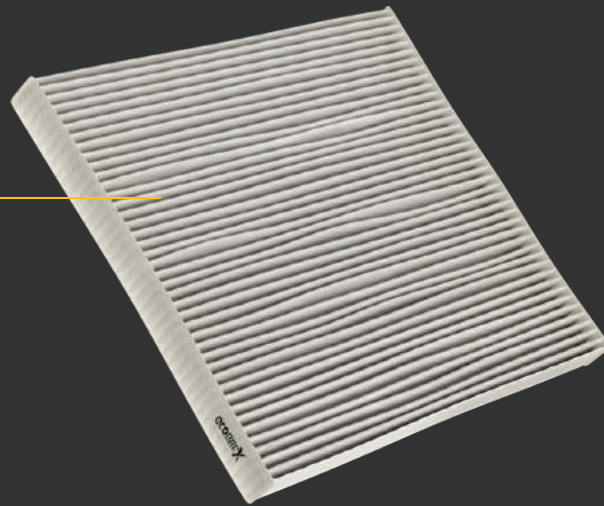

# ULTIMATE PROTECTION WITH PRECISION FILTERS ECOBREX® PROFESSIONAL CABIN AIR FILTERS

**OE** QUALITY  
PERFORMANCE

**HIGH  
EFFICIENCY  
FILTER MEDIA**

ECOBREX® CABIN AIR FILTERS FEATURES:

Cleaner air in  
passenger  
compartment

Helps remove dust,  
soot, and air born  
pollen

Helps remove  
microscopic particles  
and foul odors

Reduces allergy  
related  
problems

Improves your vehicles  
heating and air-  
conditioning performance

## PROFESSIONAL CABIN AIR FILTERS

You may think of cabin air filters as air conditioning filter you have at home. The primary task of these filters is to keep the airborne particles such as pollens and pollutants from entering the passenger cabin. Keep in mind that harmful substances inside a vehicle can be up to 6 times more concentrated than outside.

Ecobrex® cabin air filters deliver OE fit, measurement and quality for fresher, cleaner, healthier passenger cabin air. This is only possible by blocking close to 100% of airborne particles that would otherwise enter the interior of the vehicle and cause allergies among other possible health hazards.
